

Services

PAW Therapy programs are carried out with the goal of treating the client first for symptoms and then may be for the cause that produces the symptom. Cause is uncovered and dealt with in the **PAW Education** (which includes **PAW Therapy** also) programs only.

PAW Training (excludes **PAW Therapy**) is geared to train you in the techniques of **The PAW Method**

1. Body Access ~Gentle stretches and exercises
2. Chi Access ~Energy Medicine methods
3. Heart Access ~Line up emotional energy
4. Active Access ~combined application of 2 or more of above.

This **does not** turn you into a trainer or a teacher to general audience.
